
Cell Cycle Concept Map – fill in the blanks with the following terms/concepts:

- Anaphase
- Animals
- Cell conducts normal activities
- Cell plate
- Chromatids/chromosomes separate
- Chromosomes align along equator
- Cleavage furrow
- Cytokinesis
- DNA replicates
- G1
- G2
- Interphase
- Longest phase
- Metaphase
- Nucleus disintegrates, chromosomes visible
- Nucleus reforms, chromosomes uncoil
- Plants
- Prepares for division
- Prophase
- S
- Telophase
- Two daughter cells
