photosynthesis
occurs in
which are
surrounded by
have 3 regions
or
which is
features 2 main reactions
LIGHT DEPENDENT RXNS
also called
occurs in
involves
Electron transport chain
also called
occurs in
during which
can be
to form a
also called
catalyzed by
which yields
which come from
and requires
which is
also requires
which regenerates
which can
which can be
NADP+
converting it to
and
which
according to
is an
which
converts
to
such as
to
to
moves protons
from
to
causing a
result
which powers
when
map thru
process called
just like in
in a
which has
from
passed
to
to
to
to
